

iP2PGO TOKEN

A COMMUNITY TOKEN FOR MEMBERS OF IP2PGO PLATFORM

www.iP2PGO.com

A community effort

In a Co-operative (“Co-op”), members invest in the Co-op and receive a share of the Co-op income by supporting the co-op business, therefore as the Co-op prosper the members will also prosper by earning larger income on their shares.

This concept is similar to our community token concept. The more support iP2PGO receives from its members to grow the platform transaction volume, the more prosperous our members will be by getting higher amount of income from their GO token holdings, thus increasing the value of the GO token.

GO token utilities

Owners of GO tokens can use it to pay the transaction fee for crypto/fiat trade at a discounted rate (10% discount).

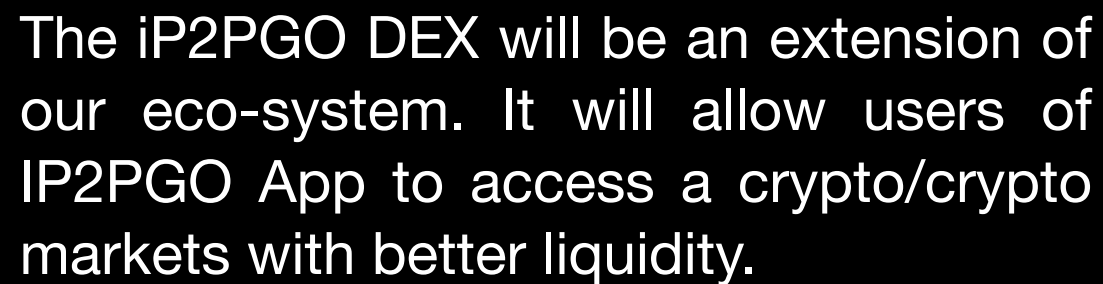

Owners of GO token are entitled to 30% share of the NET revenue earned by IP2PGO, which will be calculated and distributed on a daily basis to owners of GO token on that particular day.

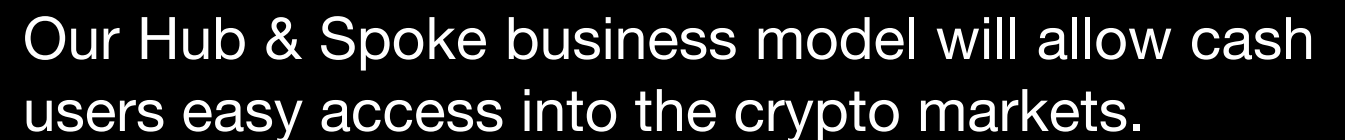

Owners of GO token can make suggestions and vote for any ERC20 token to be listed in the IP2PGO platform.

ZERO transaction fees for crypto/GO trades and ZERO withdrawal fees for GO token.

The development of iP2PGO DEX is 90% complete, beta launch and testing will follow suite.

Is this an ICO ?

We are not undertaking an Initial Coin Offering (“ICO”), our fundraising campaign is a Reverse ICO.

A Reverse ICO basically means doing the fundraising after the product is built. The iP2PGO App development has already been completed and launched on 8th October 2018 and was fully funded by iP2P Global Ltd. The iP2PGO DEX development is also fully funded by our own internal funds.

The 3,475,424.41 GO token issued to 3rd parties so far were issued to them pursuant to their involvement in our promotion programs and airdrop campaign. No funds were collected from any of the current 3,144 GO token holders.

By undertaking a Reverse ICO campaign rather than an ICO campaign, we hope that potential investors will have more confidence in iP2PGO and its business model.

GO token reverse ICO proceeds will be used to:

- I) 50%: to provide liquidity into the IP2PGO platforms by undertaking 2 way market making activities.**
- II) 40%: to fund further growth of the iP2PGO platform community by undertaking various marketing activities to grow the number of country Apps and to increase the user base for iP2PGO DEX.**
- III) 20%: to expand back-end infrastructure to accommodate the increase number of country Apps and to continue adding new features to the current Apps.**

iP2PGO (“GO”) Token Reverse ICO Termsheet
